

VACHERON CONSTANTIN

Manufacture Horlogère. Genève, depuis 1755.

PATRIMONY TRADITIONNELLE HIGH JEWELLERY SMALL MODEL

If further testimony were required of Vacheron Constantin's talent for orchestrating the Artistic Crafts, the high jewellery small model from the Patrimony collection would doubtless vividly reflect this enduring aptitude. Its 30 mm diameter is transformed into an enchanting stage for an exceptional light show. A stunning array of prong-set baguette-cut diamond totalling approximately 10.60 carats imbues time with a hint of eternity. The model also comes in 40 and 35 mm versions, both driven by a mechanical movement.

Case, dial, buckle: not a single fragment of white gold remains unpaved with precious stones. Clinging to the exquisite curves of this dazzling jewellery creation, they radiate out from the centre of the watch face so as to cover the entire surface of the watch. The resulting shimmering effect is truly mesmerizing.

T ECHNICAL DATA

	Patrimony Traditionnelle high jewellery small model
Reference	25760/000G-9945
Calibre	Quartz 13 mm x 15.70 mm (5 ^{'''} ³ / ₄ x 6 ^{'''} ³ / ₄) 2.10 mm thick 32'768 Hz 33 components 4 jewels
