

The new Marc Jenni Prologue WDT: R-Evolutionary

The superb new Marc Jenni Prologue WDT truly is *R-Evolutionary* in every sense.

Reflecting the watchmaker's passion and vision, the new WDT is the Evolution of its Revolutionary predecessor, the Marc Jenni Prologue.

Casting traditional perceptions in a new and brilliant light, the new Prologue WDT embodies the epitome of contemporary styling and simplicity through sophistication.

This remarkable modern timepiece features a crownless and unfettered sandblasted 316L stainless steel case, resulting in a bare metal satin-smooth finish, complimenting the silky motion of the Prologue WDT's turning ring mechanism for winding and adjustment.

The gentle rotation between thumb and forefinger of the Prologue's signature turning ring, as it revolves serenely around the case, transforms the otherwise jerky task of Winding, Date and Time adjustment into a natural and fluid operation.

With each push on the Prologue's unique mode selector, the W-D-T pointer moves around one position in its sunrise inspired subdial to indicate the desired function setting.

A full member of independent watchmaking's elite - the AHCI - Marc Jenni takes his widely acclaimed Prologue series to a wider audience by breathing into the Prologue WDT the winning essence of luxury sporty elegance.

"The Prologue WDT is a natural Evolution. It enriches the collection with an elegant, sporty and still very different and rare timepiece" - Marc Jenni
