

AEROWATCH – Les Grandes Classiques Chronograph Pilote

Ref. A 61948 NO03

AEROWATCH was founded in the Swiss town of La Chaux-de-Fonds in 1910 and had a forward-looking philosophy from the very beginning. With its choice of name, the company manifested its open-minded spirit and its affinity with aviation, then still in its fledgling years.

For Baselworld 2013, Aerowatch has enriched its successful "Les Grandes Classiques" collection with the new **Chronograph Pilote** model.

The personality of this prominent watch shows how rugged styling and technological finesse can be united in a conceptual masterpiece. The stainless steel case with a black PVD coating has a diameter of 42 millimeters to assure a stately presence on the wrist. The timepiece is endowed with a self-winding 25-jewel mechanical movement that can be admired through the display back.

Like a cockpit instrument, the matt black dial features luminescent hour markers and hands for outstanding legibility, even in the dark. The well-organized indications of the **Chronographe Pilote** display the date and the day of the week.

With its black leather strap and black foldover clasp, the masculine watch cuts a good figure on any wrist.

The **Chronograph Pilote** is yet another Aerowatch debut that integrates all of the attributes of Swiss watchmaking ingenuity combined with an attractive price/performance ratio.

It will appeal to many men, also outside the community of aviation enthusiasts, and is available exclusively at AEROWATCH points of sale. For further information: www.aerowatch.com
