

AEROWATCH – New Lady collection

Ref. A 06964 AA03 96DIA

The creative family of watchmakers that owns Aerowatch SA presents the **New Lady** collection. It aptly reflects the preferences of modern, self-confident women. The elegant, gently sculpted silhouette of the timepiece symbolizes feminine sensuousness and grace.

The satin-finished lugs seem to embrace the polished steel case, endowing the **New Lady** with a touch of casual panache. The lugs are set with sparkling diamonds, showcasing the refined beauty of this endearing ladies' companion.

In its center, the dial is embossed with a silvery sunburst pattern; the surround, with applied Roman numerals, is made of iridescent white mother of pearl.

A stitched, color-coordinated leather strap or a steel bracelet with polished and satin-finished links hugs the owner's wrist and heightens the seductiveness of the **New Lady**. The black onyx in the crown is a lovely attention-getter. It emphasizes the attention to detail that is one of the hallmarks of Aerowatch timepieces.

The **New Lady** models are powered by a quartz movement and have a case diameter of 32 millimeters. They are available in steel or bicolor versions, with or without diamond setting.

Starting in early June, Aerowatch points of sale will carry the entire **New Lady** collection.
