

ARMIN STROM

SWISS WATCH MANUFACTURE

ARMIN STROM Tourbillon Collection

The Manufacture joins the highly exclusive club of horologers that develop and produce their own tourbillon movements. The tourbillon of the new ATC11 calibre is distinguished by a lever worked in 18ct white gold and an assembly that places the balance wheel and seconds pinion on the same axis.

A hallmark of the Tourbillon Collection is the exposed, intricate inner mechanics. The brand has promoted modern forms of skeletonising, with designs integrated from the early stages of the calibre before being entirely crafted by hand in the Manufacture.

The ARMIN STROM Tourbillon Collection, based on the elements FIRE, EARTH, WATER and AIR present the brand's aesthetic genius and pays testament to the Manufacture's full spectrum of watchmaking skills.

TI13-TA.50 TOURBILLON AIR

Manufacture movement	ARMIN STROM calibre ATC11 Manual-winding, Tourbillon, double going barrel, 10-days power reserve, small seconds and off-centre time indications Frequency: 18,000 A/h Jewels: 24 Number of components: 184 <i>For more info on calibre, see last page</i>
