## ARMIN STROM ONE WEEK SKELETON WATER ONLY WATCH 2013

Equipped with the manual-wound ARM09 calibre, the ARMIN STROM ONE WEEK SKELETON WATER ONLY WATCH 2013 unveils its truly exclusive inner mechanics. The crown wheels, visible from the dial side, can be clearly seen to move, when the movement is being wound.

This exceptional timepiece features modern forms of skeletonising in respect to the brand's eponymous founder with designs integrated from early versions of the calibre, before they were entirely assembled in the Manufacture.

The sapphire case back, reveals the highly intricate level of component finishing: the gear-train bridge is hand-engraved in honour of the element Water – and completes this unique piece of art. The ARMIN STROM ONE WEEK SKELETON WATER ONLY WATCH 2013 celebrates craftsmanship and pays homage to the Manufacture's full spectrum of watchmaking skills.
