SWISS WATCH MANUFACTURE

ARMIN STROM One Week Skeleton Collection

With the release of the ARMIN STROM One Week Skeleton Collection, the ARMIN STROM manufacture has realised the dream of its founder – to create a skeleton entirely manufactured in-house.

The ARMIN STROM One Week Skeleton Collection again proudly reflects the distinctive features that led to the credentials and fame of the master watchmaker from Burgdorf. Thus, the going barrel springs are visible through the winding wheels. The blued small seconds hand and the bridge cut outs echo past creations. Pursuing the balance between void and matter, this watch ensures that the role of even its smallest wheel combines functionality with aesthetics. It reinterprets tradition with a sparing use of high-tech tools to conceive and skeletonise the movement, combined with highly expert component decorating skills. For the collector, the ARMIN STROM One Week Skeleton Collection, available in a yellow, rose or white gold case, represents a bridge between two worlds: The world of secular, aesthetic references and the world of inhibited watchmaking that transforms its ideas into watches.

RG14-WS.5N ONE WEEK SKELETON
