

H1 ICEBERG

A colour evocative of both East and West, day and night, blue is a natural choice to join the family of HYT liquids.

This azure fluid compliments the complexity of the mechanics, whilst adding a touch of lightness and a breath of fresh air.

The white finishes draw your gaze in beyond the tip of this "iceberg", to discover the cutting edge watch mechanism.

Eighteen months were spent researching and developing this colour, redolent of the sea and sky.

Limited edition of 50 pieces.

Available from selected HYT retailers network from the end of August 2014.

Price : EUR 52'000.-
