CT SCUDERIA

Italian design can only come from those who live and breathe the passion and style for flawless flare. A trait only inherited by birth and practice, the eye only sees superb mastery through generations of watch-makers. From the fine lines and curves to the intricate detail and craftsmanship, Enrico Margaritelli shares his family legacy with the world one face at a time.

The CT Scuderia watch matched for the world of elite sport-racing.

Designed by Enrico Margaritelli, the CT Scuderia brings to life the visions and ideas procured on the drafting boards of visionary designers

CT SCUDERIA

As a third generation Italian watch-maker, Enrico Margaritelli's impressive career includes collaborations with Fossil as head designer, as well as for Emporio Armani watch collections. Enrico comes from a family of passionate watch-makers. His biggest inspiration, his grandfather, Ariodante Margaritelli, was a dedicated watch-maker in Parma, Italy where he created highly technical precision watch instruments for the Military during World War I and II.

The clean lines of CT Scuderia were envisioned by Enrico's enthusiasm for experimenting with unusual shapes, lines, and patterns. The unique feature of the crown and pushers positioned at 12 o'clock characterize the watch as a stop-watch. Its generous 46 mm size case can be separated from the strap to be used as a neck watch/stop-watch alone.

The interchangeable perforated leather strap is the same leather utilized in luxury sportscars, hand-made in Switzerland. The CT Scuderia is of the first watch houses to acquire RONDA quartz movement 3520D, which will be produced in limited quantities in 2012.
