

TWENTY-8-EIGHT AUTOMATIC

With its subtle blend of character and refinement, the Twenty-8-Eight Automatic watch joins the prestigious lineage of iconic models from the DeWitt Manufacture.

Since 2010 this collection, with its poised, urban design, has enjoyed playing with contrasts by casing up in rose gold or white gold, along with innovative materials and a wide range of refined hues for its dials.

DeWitt is marking its 10th anniversary year with a new creation, a feast of refinement, dressed in exquisite pink gold and decidedly contemporary grade-5 Neotitanium, both enhanced with a bright and sumptuous white dial.

Its 43 mm round case adorned with the famous imperial columns, houses a sturdy and reliable automatic movement running at 28,800 vph and with a power reserve of 42 hours.

The hours, minutes and seconds are set against a backdrop of a dial artistically divided into two guilloché zones, giving this model a soft light. There is a small flame motif at the dial's center, surrounded by an elegant radiating pattern, the two separated by an appliqué circle of rose gold color tone. The time is indicated by Roman numerals at the four cardinal points connected by discrete appliqué Arabic numerals positioned at 5-minute intervals.

Like all of its creations, Twenty-8-Eight Automatic perfectly meets the very high finishing standards adopted by the DeWitt Manufacture: brushed, polished and beveled. The small "W" signature also appears on the 18 ct rose gold crown and on the buckle.

Bridging classicism and innovation, the new Twenty-8-Eight Automatic watch harmoniously combines materials and shades, proudly joining the ranks of DeWitt's iconic models.
