

“OCTA SPORT” IN TITANIUM

The new timepiece in the F.P.Journe “lineSport”

New addition to the lineSport, F.P.Journe introduces the Octa Sport with a case in Titanium grade 5, high tech and ultra light material of dark grey colour with matte finishing. In a quest for performance and lightness, the movement and dial are made of aluminium alloy and this watch weighs from 60 to 70 grams depending of the model.

The Octa Sport Titanium offers 120 hours power reserve (5 days) and a rotor in Titanium with Tungsten segment using each movement of the wrist. Rubber inserts fixed with an outstanding process to the sides of the case and the links of the bracelet reinforce its contemporary design.

The new Octa Sport Titanium is also proposed with a rubber strap and both versions are available from all F.P.Journe Boutiques and points of sale.

The lineSport is conceived specifically for a sportive lifestyle, coupled with an automatic movement of authentic high horology. The Octa Sport in Titanium retain the properties of the Octa calibers: five days power reserve, central hour and minutes, small second at 6h, power reserve at 10h30, day/night indication at 9h, and a large date at 1h.

Octa Sport - Technical Specifications

Movement	Automatic Calibre FPJ 1300-3 Unidirectional automatic winding Movement in aluminium alloy
Dimensions of the movement	Overall diameter: 30.80 mm Casing-up diameter: 30.40 mm Overall height: 5.70 mm Height of winding stem: 3.00 mm Diameter of stem thread: S0.90 mm
Balance	Four adjustable inertia weights Anachron free-sprung flat balance spring Mobile stud holder Free Sprung Nivatronic laser soldered balance spring Pinned GE stud Frequency : 21'600 Alt/h, 3 Hz Inertia : 10.10 mg/cm ² Angle of lift : 52° Amplitude : 0 h dial up : > 300° 24 h dial up : > 280°
Main characteristics	Three position crown: Winding of the watch in position 0 , clock wise Correction of date in position 1 , anti clockwise Correction of time in position 2 Instant jump calendar Off centre winding rotor in Titanium with Tungsten segment Barrel with slipping spring Escapement 15 tooth
Indications	Centred hours and minutes Small second at 6h00 Day/Night indication at 9h00 Power reserve at 10h30 Large date at 1h00
Autonomy	120+/- 12 hours Winding Speed on watch winder: 274 rotations / 24 hours
Decoration	Circular Cotes de Genève on bridges Partly circular graining on baseplate Polished screw heads with chamfered slots Chamfered and circular grained wheels Steel components hand polished and chamfered
Case	Titanium with rubber inserts Diameter: 42.00mm Total height: 11.60mm
Dial	Aluminium alloy and sapphire Superluminova hands Superluminova appliqué indexes 12 luminescent points
Number of parts	Movement without dial 286 Cased up with Titanium bracelet 510 Cased up with rubber strap 293 Jewels 40
Weight	Total weight on rubber strap 60 g Total weight on Titanium bracelet 70 g Movement alone 11 g Sapphire glass sub dial 2 g
