GIRARD-PERREGAUX
VINTAGE 1945 LADY

The Girard-Perregaux Vintage 1945 Lady is enhanced by a new dial decorated with a row of white diamonds and elegant Arabic numerals. This new and glamorously showcases the clean and precise style of an iconic watch collection.

Inspired by Art Deco style, the Vintage 1945 Lady unveils a whole new face with a dial elegantly adorned with a row of diamonds, protected by a steel case that is itself, also gem set. Managing to be both structured and voluptuous in form, it beats to the rhythm of a movement that is exceptional in both its size and performance. The manufacture mechanical caliber GPO2700 is a movement of reduced dimensions that is specially adapted to the needs of ladies' watches.

Shimmering with iridescent reflections, the dial of the Vintage 1945 Lady naturally represents the exquisite Art Deco-inspired design that is so characteristic of this collection. It is highlighted by a double curve that forms a convex dome, creating a regular and harmonious unity of volumes. The setting of 42 brilliant-cut diamonds at its center recalls the rail track minute display of the original models of the collection. The Arabic numerals 3, 9 and 12 are clearly distinguished, while the date appears in a discreet aperture at 6 o'clock. Delicately shaped yet sturdy, the dauphine type hands have a diamond-finish surface that creates a darting interplay of reflections. The watchmaker reworks each hand by hand so as to curve it to match the inclination of the dial.

Flanked by its two lateral shafts, the steel case is delicately cambered. Each horn is set with 15 diamonds to form two dazzling rows of stones. At 12 o'clock and 6 o'clock two gadroons emphasize the lugs and give a structure to it as a whole. The case-back, secured by screws, is fitted with a sapphire crystal that affords a view of the movement's oscillating weight, decorated with a tapestry motif. Technically and aesthetically outstanding, the caliber is among the smallest to be found in watchmaking, with its diameter of only 19.4 mm. Illustrating all of Girard-Perregaux's savoir-faire and expertise, it offers hour, minute, and date functions.

SOME SPECIAL FEATURES OF THE GIRARD-PERREGAUX CALIBER GPO2700

- A unidirectional rotor with non-lubricated ceramic ball bearings.
- An escape-wheel pivoting between two corresponding settings.
- A swiveling balance-cock offering greater accuracy for controlling the movements of the balance. A solution that enhances performance and long-term reliability, thus significantly assisting watchmakers when making their adjustments.
