

HARRY WINSTON

HARRY WINSTON OCEAN DIVER

The Harry Winston Ocean Diver is that rare combination of a timepiece that represents both the most rigorous of technical requirements with one that has an absolutely distinctive and refreshingly original personal style. Both a high-precision diver's tool and a dramatically different expression of the spirit of adventure a diver's watch personifies, the Harry Winston Ocean Diver is at once instrument and work of art.

Like any true diver's watch, all the technical necessities to qualify the Harry Winston Ocean Diver for life in or out of the water are there. A unidirectional rotating bezel, which can be used for timing decompression stops, is present, along with high visibility, luminous markers and hands. As required by international standards for diving watches, the Harry Winston Ocean Diver is water-resistant to 200 meters. And, in a further addition to its functional versatility, the Harry Winston Ocean Diver is a self-winding, three-register chronograph with a frequency of 28,800 vibrations per hour and a power-reserve of 42 hours, capable of timing intervals of up to twelve hours in length.

This interpretation of the classic diver's instrument watch, however, is transformed by the vision of Harry Winston into a luxuriously bold statement on the wrist. The 44 mm diameter case of the Ocean Diver is made of Zanium™, a material unique to Harry Winston, and simply the ideal material for a technical diver's watch as it is not only light and strong but also extremely resistant to corrosion. The bezel of the timepiece is executed in either 18k white or rose gold; an especially delightful touch is that the bezel rotates beneath twin Zanium™ arches, which also function as the guards for the winding crown. The chronograph pushers are smoothly integrated into the curvature of the case flank.

As with all Harry Winston timepieces, the dial is both a means for displaying information and a complex but harmonious sculpture in three dimensions, with three different surface finishes: snailing, rhodium plated, and –emphasizing the two chronograph registers –Côtes de Genève, whose fluid radiance is an *homage* to the aquatic world for which the Harry Winston Ocean Diver is designed.

Finally, Harry Winston's signature "Shuriken" power indicator not only adds an element of dynamic animation to the dial, but also serves a critical function when the timepiece finds itself in use in its natural undersea environment - it lets the user known with a glance that the watch is running properly.

Above or below the waves, the Harry Winston Ocean Diver is an expression of both the spirit of adventure and the uniquely bold design vision of Harry Winston.

HARRY WINSTON

HARRY WINSTON OCEAN DIVER

Name	Ocean Diver
Reference	410/MCA44RZC.K
Movement	
Type	Mechanical with automatic winding
Power reserve	42 hours
Vib./hour	28'800
Rubies	63
Functions	Hours, minutes Chronograph, 30-minute counter at 9 o'clock, 12-hour counter at 6 o'clock Date Power indicator (Shuriken)
Case	
Material	18K rose gold and Zaliu™ 18K polished rose gold and notched Zaliu™ rotating bezel Super Luminova at 12 o'clock, engraved black lacquer indexes Zaliu™ satin brushed arches, polished push buttons and crown
Crystal	Sapphire
Case back	Closed, Zaliu™
Diameter	44 mm
Thickness	13.75 mm
Water resistance	200 meters
Dial	Dark dial snailed finish and polished rhodium-plated center Côtes de Genève in rhodium color between 4 and 10 o'clock Super Luminova on hands and indexes Applied subdials at 3, 6 and 9 o'clock Grey and white flange
Strap	Black rubber
Buckle	
Type	Ardillon
Material	18K rose gold
Collection	Harry Winston The Ocean Collection™
