

HARRY WINSTON

Ocean Sport™ Chronograph

A prime example of innovation and cutting edge design, the Ocean Sport™ collection represents a state of mind nurtured by challenges, a strength of conviction. Its sporting personality highlights its powerful nature. Its design places it firmly in the avant-garde of a 21st century spirit distinguished by innovation and accomplishment. This year, Harry Winston is introducing a deep blue smoked sapphire dial for the Ocean Sport™ Chronograph.

Made to appeal to demanding men who love high-tech and performance, the Ocean Sport™ Chronograph is carved in Zalium™, an aerospace type zirconium alloy exclusive to Harry Winston in watchmaking. Light, non-allergenic, harder than titanium and extremely corrosion-resistant, Zalium™ is a true revolutionary material that bears the signature of innovation and sets the performance bar very high. Its impressive chemical properties are matched by its rarity: zirconium is far scarcer than titanium and its exceptional hardness makes it very hard to machine. Zalium™ is not only a technically superb material for high performance sports timepieces; its lustrous, gunmetal silver-grey sheen gives the Ocean Sport Chronograph™ an unmistakable identity.

Visual depth, fine mechanics, and technical sophistication: the Ocean Sport™ Chronograph offers a total immersion experience plunging observers into the very heart of time technology. The 44 mm Zalium™ case frames an open-worked three-dimensional smoked blue sapphire dial, with a blue minute subdial and a matt varnished blue flange that lends added depth to the time functions.

The intricate workings of the black DLC treated automatic movement with a skeletonized chronograph module are clearly visible beneath the Super Luminova enhanced hands, distinctly pointing to the hours and minutes marked on the flange, and ensuring a perfect legibility of the time. A skeletonized date disk turns steadily in order to clearly display the date at 12 o'clock, inviting the gaze to boldly explore the intricate gearwheels of time itself.

The satin finish lugs, the push buttons, and the beveled triple arches at 3 o'clock have also been revisited in this Ocean Sport™ Chronograph model. The rotating bezel, comprised of two parts, features a satin finish Zalium™ and Zalium™ DCL coated three-dimensional notched ring, enhancing the powerful, contemporary personality of the timepiece.

Sporty and skillfully crafted, the Ocean Sport™ Chronograph bears a strong character and powerful tones. Technical excellence and the pursuit of a particular esthetic join to energize this timepiece, which offers a power reserve of 42 hours and is water-resistant to 200 meters.
