

## CLASSIC FUSION 38 mm

Back in 2008, Hublot was transforming the iconic Big Bang with a new reinterpretation towards a more classic sporty chic look: The Classic Fusion. Sporting a finer profile, it remained resolutely true to the distinguished Hublot design while rediscovering a more traditional side.

Now in 2012 the Classic Fusion comes into a new size 38mm, very elegant both for women or men, with a multitude of versions: rose gold, titanium, bezel set with diamonds, black ceramic and a choice of dials accordingly, from black, carbon black to white and opalin. Its elegance from the classic and timeless values of traditional watchmaking makes this new Classic Fusion 38mm a new signature of the Hublot iconic design.
